

Application No.: 10/035,056

Docket N .: JCLA8425-R

### AMENDMENTS

#### In The Claims:

1. (Currently Amended) A non-linear optical material comprising a ~~metallie~~ pure bismuth film ~~capable of~~ that is sufficiently thin for producing non-linear refraction and non-linear absorption.

2. (Currently Amended) The non-linear optical material of claim 1, wherein the ~~metallie~~ pure bismuth film is formed by pulsed laser deposition.

3. (Currently Amended) The non-linear optical material of claim 1, wherein a thickness of the ~~metallie~~ pure bismuth film is approximately 10.5nm.

4. (Currently Amended) The non-linear optical material of claim 1, wherein the ~~metallie~~ pure bismuth film is covered by a top protective layer.

5. (Original) The non-linear optical material of claim 4, wherein the top protective layer is transparent.

6. (Original) The non-linear optical material of claim 4, wherein the top protective layer comprises  $\text{Al}_2\text{O}_3$ .

Application No.: 10/035,056

Docket No.: JCLA8425-R

7. (Currently Amended) The non-linear optical material of claim 1, wherein the ~~metallic~~  
pure bismuth film is disposed on a base layer.

8. (Original) The non-linear optical material of claim 7, wherein the base layer comprises  
glass.

9. (Original) The non-linear optical material of claim 7, wherein the base layer comprises  
quartz.

10. (Original) The non-linear optical material of claim 1, which is used as a non-linear  
optical device in an optical method or in an optical apparatus.
